TT Spark Plugs | The DENSO Difference

DENSO has been setting the standard for spark plug technology since 1959. We develop all of our ranges in-house, and manufacture them in our own QS 9000 and ISO 9000 certified factories worldwide – with ‘zero-defects’ as standard. We also provide this outstanding OE quality to the aftermarket.

The patented DENSO TT Spark Plugs are manufactured using Super Ignition Plug (SIP) technology. They deliver superb reliability, lower emissions and excellent fuel economy, and offer a highly consolidated range with a limited number of part numbers.

IRIDIUM TT (IrTT)

Introducing the Iridium TT Spark Plug - featuring, at 0.4mm, the world's smallest diameter centre electrode and a 0.7mm ground electrode. This aftermarket range makes advanced OE-quality technology available to a wider range of vehicles at an affordable cost.

WHY DENSO IrTT

- > Two ultra-fine, highly durable 0.4mm iridium centre and 0.7mm platinum ground electrodes
- > Life span of 120,000 Km
- > Improved performance of up to 20% compared with traditional Nickel plugs
- > Fuel savings
- > Premium OEM technology now available at a lower price for a wider range of vehicles
- > Highly consolidated range: few part numbers covers the majority of top selling EU car parc

ADVANTAGES

SUPERB IGNITABILITY

- > Iridium TT's two needle-thin electrodes – an ultra-fine iridium 0.4mm centre electrode and a 0.7mm platinum ground electrode – act as thin ‘fingers’, allowing the spark to move grow 360 degrees in all three dimensions. This improves the ability of the air and fuel mix to ignite and in turn, allows the spark flame to expand quicker and better, optimising both fuel economy and performance.

ENHANCED DESIGN

- > The design of the plug means that less voltage is required to create the spark and less energy to make the connection between electrodes. DENSO's cutting-edge technology has created a unique iridium rhodium alloy with the highest iridium ratio in the market for the centre electrode as well as a bespoke platinum alloy for the ground electrode. The resulting spark is more corrosive and allows an extended lifespan of the plug.

REDUCED EMISSIONS

- > The faster flame growth allowed by the needle-like electrodes means that more of the fuel mixture gets burned totally. This improves power and the use of less fuel to generate the same power output, resulting in less wasted fuel in the exhaust.

IMPROVED OUTPUT

- > The Iridium TT plug better controls the vehicle's engine, resulting in reduced misfiring and less fluctuation in the engine revs, particularly while idling.

NICKEL TT (NiTT)

If you are looking for a highly ignitable, high quality, durable Spark plug without the costs associated with high performance plugs, then look no further.

WHY DENSO NiTT?

- > The first ever fine-wired Spark Plug without precious metal on the electrodes
- > Slimmer nickel alloy centre and a twin protruding ground electrode provide better ignitability than a DENSO Nickel Plug
- > Smooth engine running even under extreme conditions
- > Improved fuel efficiency
- > Less stock, same coverage: NiTT plugs cover many applications with fewer part references
- > Best value for money performance spark plug

ADVANTAGES

REDUCING EMISSIONS

- > Improved ignitability leads to less combustion fluctuation, resulting in less fuel consumption and significantly reduced CO, CO² and HC emissions.

FUEL EFFICIENCY

- Intelligent design for improved fuel consumption
- > Its excellent ignitability ensures better combustion that can ignite leaner mixtures, resulting in less misfiring than a Standard Plug
- > Tests show that when comparing a Standard Plug with a TT Plug, fuel consumption improves by up to 5%, meaning those regular and longer journeys become more economical

BORN FOR COLD STARTS

- Improved ignition performance for a reliable start
- > With less voltage required to start your engine, this means a quicker, stronger start even in extreme cold weather conditions
- > Incorporating an exceptionally fine centre electrode – 1.5mm compared to a standard size of 2.5mm – the spark produced is much stronger, especially in lower temperatures, producing better ignition performance

NEW

IRIDIUM TT ...it's what's inside that counts

Introducing the new Iridium TT - featuring, at 0.4mm, the world's smallest diameter electrode. With superior ignitability and three times the lifetime of a standard nickel spark plug, the Iridium TT delivers better fuel economy and all-round optimum vehicle performance. Our history of innovation, combined with the OE-level

quality of our aftermarket range, means you can now purchase even better products at affordable prices. And with the creation of a consolidated spark plug range, making it even easier for you to identify the right product, there's never been a better time to invest in DENSO's pioneering technology.
